ABSTRACT

An original and cutting-edge project called The Meme Museum seeks to compile a curated collection of memes from various online venues, including social media, forums, and image-sharing services. By chronicling the development of internet humour and its influence on our culture and society, this project aims to preserve the most well-known and significant memes from the past and present. A wide variety of memes, including picture macros, viral videos, and catchphrases, will be on display at the Meme Museum along with information about their history, cultural relevance, and other factors. Visitors to the museum will have a thorough grasp of the cultural significance of online memes and how they have changed through time. The research will also examine how memes affect society and politics, including how they influence public opinion and how they might be used for activism or propaganda. The museum will also have exhibitions on the creative process of producing memes, showcasing the creativity and talent of meme makers as well as the online communities that support meme culture. The Meme Museum's overall goal is to give visitors a distinctive and enjoyable experience by displaying the most popular and significant memes of the modern period and delving into their cultural, social, and historical relevance.

INDEX

CHAPTER 1

INTRODUCTION

Cloud Application Development (CAD) techniques have profoundly transformed our ability to develop a website. CAD techniques have been applied for a long time in security and industrial domains. This platform seeks to offer a centralised platform for meme fans to explore, share, and take pleasure in amusing content. Memes have evolved into an essential component of internet culture. It utilises the strength and scalability of cloud services using a cloud-based design. It makes it possible for users to access the Meme Museum from any location and on any internet-connected device. Continuous performance, high availability, and effective data storage are all provided by the cloud architecture. Social media images that have more dataset which attract the user. Cloud technologies, effective front-end and back-end development, and safe authentication are all combined in "The Meme Museum: A Curated Collection of Hilarity" to give users a fun and delightful experience while they explore and share the memetic universe. The spread and virality of the content are increased thanks to integration with well-known social media platforms that make it simple for users to share memes on their chosen networks.

1.1 PROJECT OVERVIEW

"The Meme Museum: A Curated Collection of Hilarity" offers meme fans a central location to browse, share, and take pleasure in funny material. The project uses cloud technologies for scalability, performance, and data storage while attempting to create a user-friendly and aesthetically pleasing experience. Users have the ability to register, sign in, and securely validate their identities. This guarantees individualised interactions and makes features like favourite-keeping, commenting, and meme-sharing possible. To manage meme

content, including adding, changing, and removing memes, the application offers an admin panel. Admins can manage user-reported content, select prominent memes, and preserve the collection's general calibre.

1.2 PURPOSE

This application has Curated and Showcase memes, The Meme Museum offers users a wide selection of humorous content by curating a library of memes. It attempts to highlight well-known, trending, and user-generated memes in order to give viewers access to a wide range of hilarious works. By uploading their own works, individuals are encouraged to actively contribute to the meme collection. This increases the variety of content available in the museum while allowing individuals to express their humour and creativity. User submissions are moderated to preserve quality and abide by community standards. The application's main objective is to make users laugh and have fun. The Meme Museum seeks to create a joyful, entertaining, and amusing online experience for users by selecting and showcasing a selection of humorous content.

CHAPTER 2

LITERATURE SURVEY

This chapter deals with the literature survey for the better understanding of the relevance for the enhancement of the proposed work. Explore the papers you've chosen in further detail, paying close attention to their methods, findings, and conclusions. Look for information on best practises, insights, and advice for developing cloud applications, engaging users, and content curation. This methodology is implemented by the effectiveness for meme pages and classify to the group accuracy.[1] Identifying Relevant Keywords: Start by coming up with a list of words and phrases that are relevant to your project, such as "meme museum," "cloud application development," "humour in technology," "user engagement," and "social media platforms." These search terms will be useful to you as you look for pertinent books.[2] Identifying Relevant Keywords: Start by coming up with a list of words and phrases that are relevant to your project, such as "meme museum," "cloud application development," "humour in technology," "user engagement," and "social media platforms." These search terms will be useful to you as you look for pertinent books.[3] Examine the Following Publications: Examine the abstracts, introductions, and conclusions of the publications you have chosen to determine their applicability to your research. Studies on cloud-based apps, user interaction tactics, social media platforms, content curation, and user-generated material should be prioritised.[4] Analyse Research Findings: Look more closely at the techniques, outcomes, and conclusions of the chosen publications. Look for information on best practises, insights, and advice for developing cloud applications, engaging users, and content curation.[5] Examine the Following Publications: To decide whether the following publications are relevant to your research, look over their abstracts, introductions, and conclusions. Prioritise your research on cloud-based apps, user engagement strategies, social media platforms, content

curation, and user-generated content.[6]Analyse Research Findings: Examine the methods, results, and conclusions of the selected articles more carefully. To design cloud apps, engage users, and curate material, look for knowledge on best practises, insights, and guidance.[7] Record and Summarise: Write down the main conclusions, ideas, and sources from the literature review. Write a succinct summary of the important aspects that will help you decide on the technological stack, user interaction tactics, and content curation as your project develops.

CHAPTER 3

IDEATION PHASE AND PROPOSED SOLUTION

3.1 EMPATHY MAP CANVAS

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviors and attitudes. It is useful to solve the user problems in the application. Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges. Effective expense tracking and reporting to avoid conflict. As a project manager or business owner, you can set clear policies for the expense types and reimbursement limits to avoid misunderstandings are about costs.
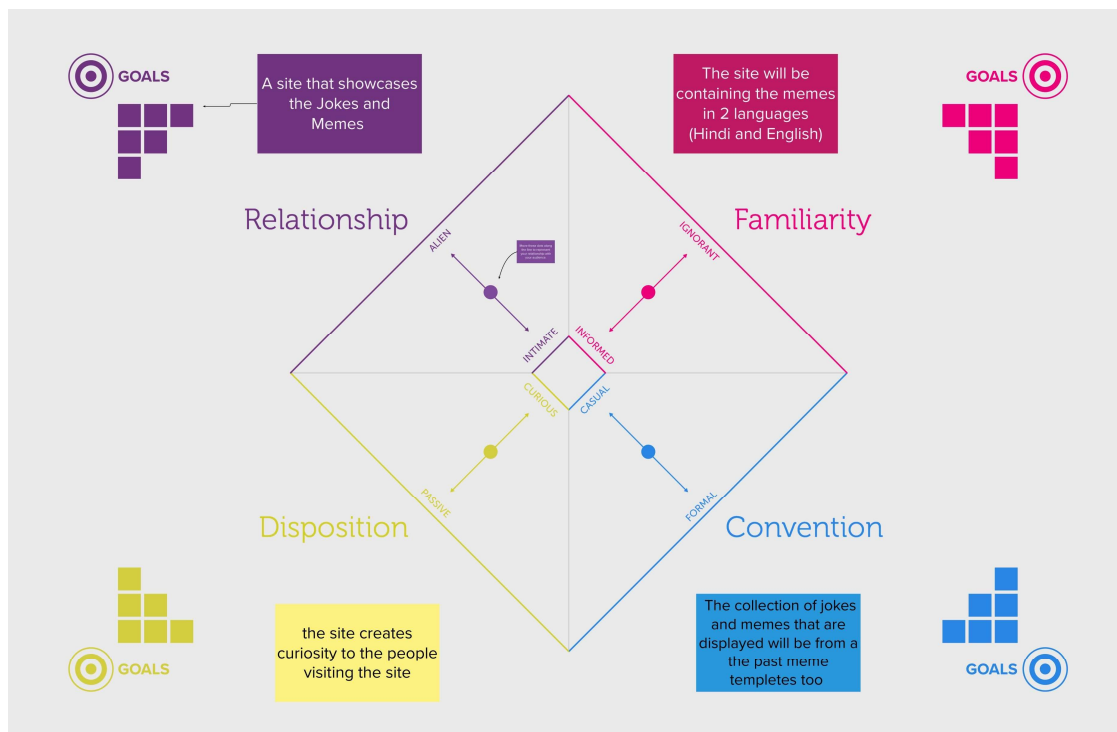

3.2 BRAINSTORMING

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich number of creative solutions. To create a house full of memes to make a customer happy and to share the memes. The museum would be divided into different sections based on themes such as "Classics", "Viral Hits", and "Controversial Memes". Each section would feature a display of memes, accompanied by explanations of their origins and significance. Visitors would be able to interact with the exhibits through interactive installations, videos, and displays.
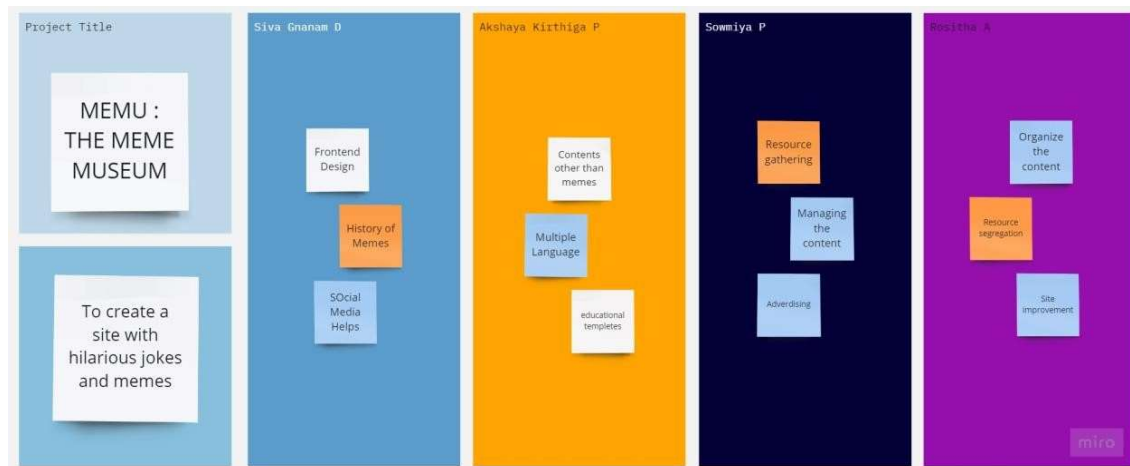

Team Gathering, Collaboration and Select the Problem Statement

3.3 PROPOSED SOLUTION

Proposed solution is the one in which we are making use of a convolution neural network to create a model that is trained on different hand gestures. A website is built which uses this model. This website enables deaf and dumb people to convey their information using signs which get converted into human- understandable English alphabets and is given as output. The proposed solution section should offer the solution specifically, with enough detail so that the reader understands exactly what we're proposing. Indicating how the proposed solution will solve the problem and that will provide tangible benefits.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	The internet is flooded with countless memes that have become significant part of online culture. In order to resolve the flooding creating a website with greater access.
2.	Idea / Solution description	To create a house full of memes to make a customer happy and to share the memes. The museum would be divided into different sections based on themes such as "Classics", "Viral Hits", and "Controversial Memes". Each section would feature a display of memes, accompanied by explanations of their origins and

		significance. Visitors would be able to interact with the exhibits through interactive installations, videos, and displays
3.	Novelty / Uniqueness	The Meme Museum's distinctive method of exhibiting humour and online culture will draw a variety of visitors, including casual guests seeking a fun and interesting experience as well as meme lovers and internet culture specialists. This will enhance the Meme Museum's appeal as a one-of-a-kind attraction and make it a special destination for visitors of all ages and backgrounds.
4.	Social Impact / Customer Satisfaction	Customer happiness may be influenced by a number of elements, including the calibre and range of the memes on display. The Meme Museum may take into consideration using surveys or feedback forms to get opinions from visitors in order to determine consumer satisfaction levels
5.	Business Model (Revenue Model)	This model gives the revenue by sponsorship,ADS,Subscription.

6.	Scalability of the Solution	The museum may continue to develop and change throughout time by concentrating on its core competencies, paying attention to visitor comments, and remaining flexible and adaptive.

CHAPTER 4

REQUIREMENT ANALYSIS

4.1 FUNCTIONAL REQUIREMENT

These are the requirements that the end user specifically demands as basic facilities that the system should offer. All these functionalities need to be necessarily incorporated into the system as a part of the contract. These are represented or stated in the form of input to be given to the system, the operation performed and the output expected. They are basically the requirements stated by the user which one can see directly in the final product, unlike the non-functional requirements.

Following are the functional requirements of the proposed solution

FR.NO	FUNCTIONAL REQUIREMENT	SUB-REQUIREMENT
FR-1	User Registration and Authentication	User able to create account and provide passwords.
FR-2	Exploration and Research	It should be able to explore more and more
FR-3	Community	User can post their comments and they can grow into a community
FR-4	Sharing	The application should integrate with popular social medias.

| FR-5 | Content Management | Admin can access, edit and remove posts. |
| FR-6 | Mobile Responsiveness | The application should be responsive and accessible in various devices |

4.2 NON- FUNCTIONAL REQUIREMENT

These are basically the quality constraints that the system must satisfy according to the project contract. The priority or extent to which these factors are implemented varies from one project to other. They are also called non-behavioral requirements.

Following are the non-functional requirements of the proposed solution.

FR.NO	NON-FUNCTIONAL REQUIREMENT	DESCRIPTION
NFR-1	Performance	Application should have fast response and ensuring that users can browse without significant delays
NFR-2	Scalability	It is designed like increasing the number of users and accommodate future growth.

NFR-3	User Experience and Usability	Responsiveness and consistency over different devices and screen sizes
NFR-4	Maintainability	The codebase is well-structured, modular and maintainable, bug fixes
NFR-5	Integration	It is designed to allow third party cookies and API's
NFR-6	Security	The users data is transmitted using encrypted mechanisms

CHAPTER-5

PROJECT DESIGN PHASE

5.1 SOLUTION ARCHITECTURE

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.

- Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.

- Define features, development phases, and solution requirements.

- Provide specifications according to which the solution is defined, managed, and delivered.
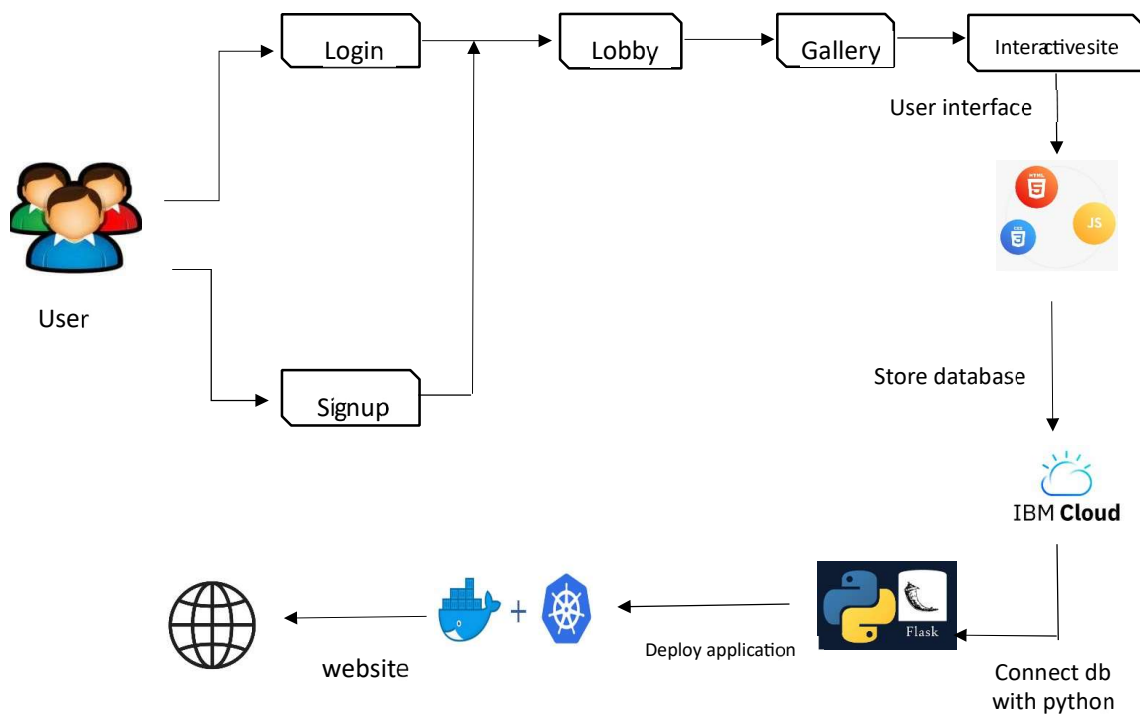

SOLUTION ARCHITECTURE DIAGRAM

5.2 TECHNOLOFY STACK

The collection of software tools, programming languages, frameworks, libraries, and infrastructure parts used to create and deploy a software application is referred to as a "technology stack." It is the collection of technologies and layers that come together to build an application's functionality and architecture.
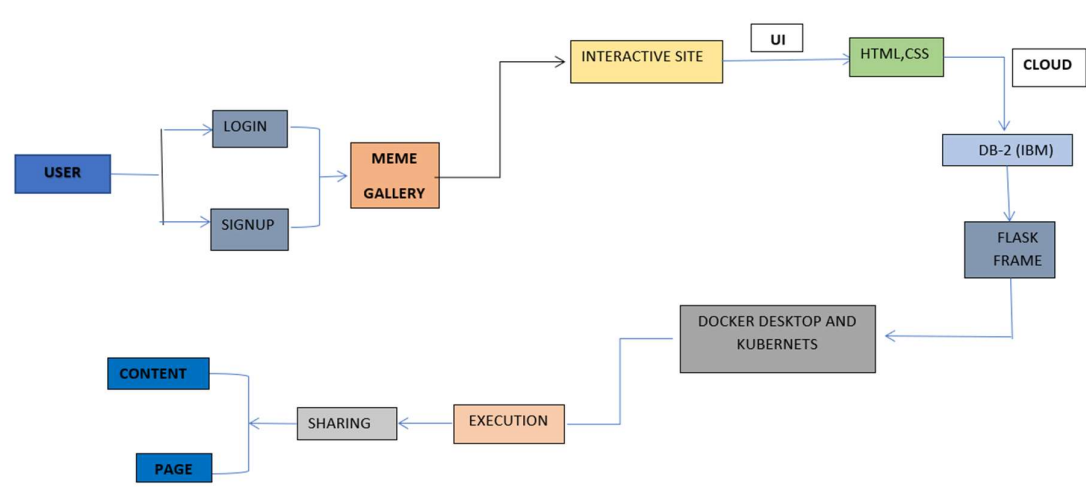

TECHNOLOGY STACK DIAGRAM

**5.3 DATA FLOW DIAGRAM**

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.
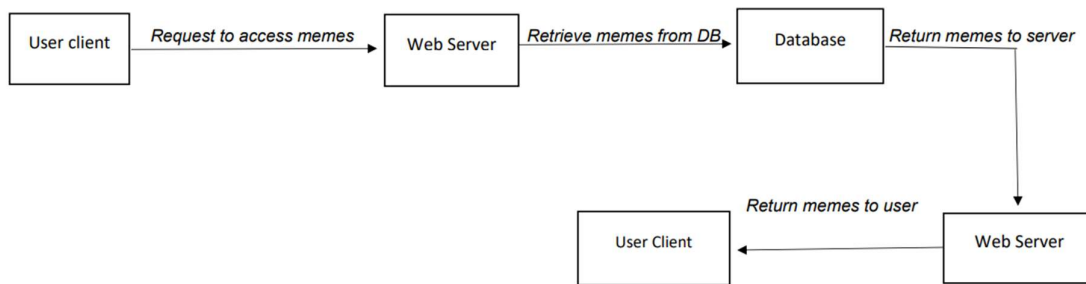

DATAFLOW DIAGRAM

COMPONENT	DESCRIPTON	TECHNOLOGY
User Interface	How user interacts with application e.g. WebUI, Mobile App	HTML, CSS, Javascript
Application Logic-1	Logic for a procees in the application	Python

Application Logic-2	Logic for a procees in the application	Using Flak framework in Python
Database	Data Type	MySQL
Cloud Database	Database Service on Cloud	IBM DB2
File Storage	File Storage requirements	Login and Registration
External API	Purpose of external API used in the application	Docker

CHAPTER-6

PROJECT PLANNING

6.1 TECHNOLOGIES USED

User Interface:

- HTML
- CSS
- Javascript

Framework:

- Python using Flask framework

Database:

- IBM Cloud DB2

Deployment:

- Docker and Kuberentees

6.2 USER STORIES

In order to quickly locate memes that suite the user's mood or interests, a user want to be able to explore several meme categories, such as hilarious, sarcastic, and trending. In order to add to the collection and interact with other meme fans, a user want to be able to upload and share my own memes with the communiyt. It should be able to like and comment on memes as a user so that they can show show their support for the ones that all think amusing or fascinating and interact with other users.

User Type	Functional Requirement	User Story Number & User story/Task	Acceptance criteria
Customer(Mobile user)	Registration	USN-1 As a user,, I can register for the application by entering my email, password, and confirming my password.	I can access my account / dashboard
		USN-2 As a user, I will receive confirmation email once I have registered for the application	I can receive confirmation email & click confirm
		USN- As a user, I can register for the application through Facebook	I can register & access the dashboard with Facebook Login
		USN-4 As a user, I can register for the application through Gmail	One time password through gmail.
	Login	USN-5 As a user, I can log into the application by entering email & password	
	Dashboard	As a user,I can find the history and shared memes.	
Customer (Web user)		USN-1 As a user,I can browse the curated	

		collection of memes,so that I can share and enjoy them with others.	
		USN-2 As a user, I want to rate and provide feedback on memes to express my opinions and contribute to the community.	I can access my account / dashboard
Customer Care Executive		As a Executive ,I want to add new hilarious memes to collection of memes for providing a better experience and entertainment	
Administrator		As a administrator,I want to check and make sure that all the memes are tagged with relavent keyword to enchance the searchability and to maintain a good page.	

<div align="center">

CHAPTER-7

CODING AND SOLUTION

</div>

7.1 FEATURES

7.1.1 HOME PAGE
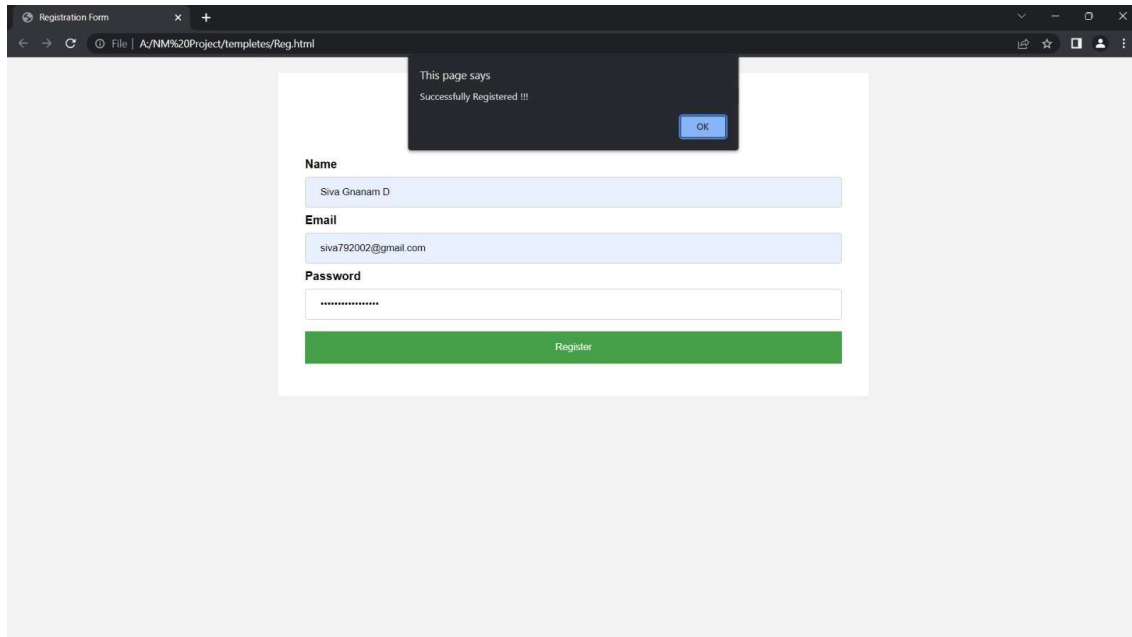

Home page is done using HTML,CSS and Javascript. A user can register or login to the page

<div align="center">
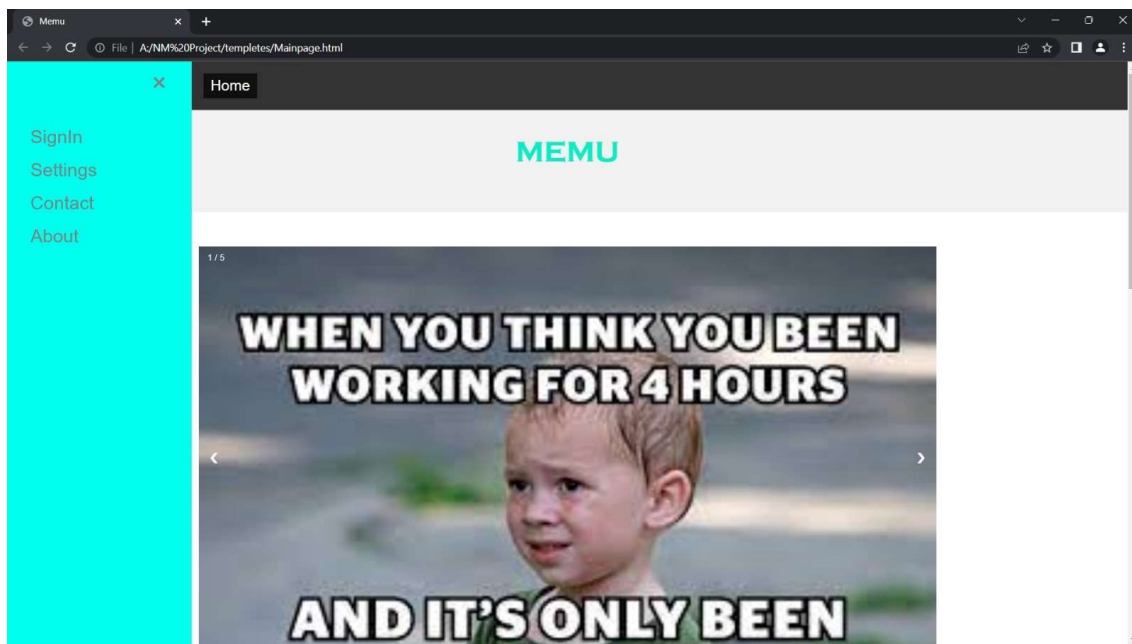

7.1.1 Home Page

</div>

7.1.2 REGISTRATION PAGE

A user can signup with their username,email and password.Then the user is redirect into the home page.

7.1.2.a. Registration Page
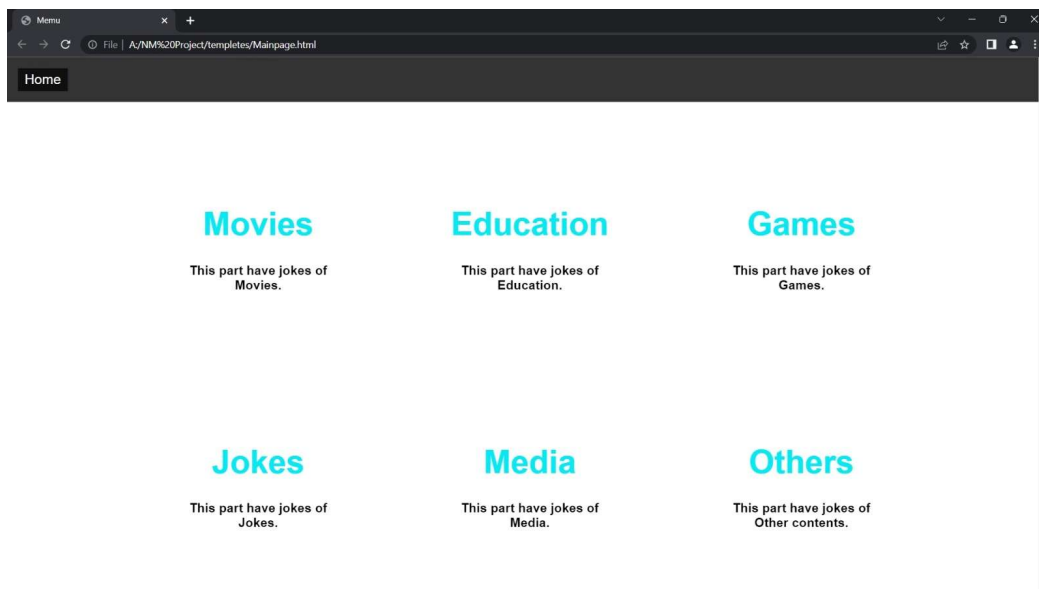

7.1.2.b Redirected Page

7.2 DB2 CONNECTION

The database is connected to the IBM cloud DB2

```
conn=ibm_db.connect("DATABASE=bludb;HOSTNAME=54a2f15b-5c0f-46df-8954-
7e38e612c2bd.c1ogj3sd0tgtu0lqde00.databases.appdomain.cloud;PORT=32733;SECURIT
Y=SSL;SSLServerCertificate=DigiCertGlobalRootCA.crt;UID=bfd76926;PWD=LlT33W9dy
1RVnlXG" ,'' ,'')
```

CHAPTER-8

TESTING

8.1 TEST CASES

Software Testing Type is a classification of different testing activities into categories, each having, a defined test objective, test strategy, and test deliverables. The goal of having a testing type is to validate the Application under Test for the defined Test Objective.

For instance, the goal of Accessibility testing is to validate the AUT to be accessible by disabled people. So, if your Software solution must be disabled friendly, you check it against Accessibility Test Cases.

A test case is a set of actions performed on a system to determine if it satisfies software requirements and functions correctly. The purpose of a test case is to determine if different features within a system are performing as expected and to confirm that the system satisfies all related standards, guidelines and customer requirements. The process of writing a test case can also help reveal errors or defects within the system.

8.2 USER ACCEPTANCE TESTING

- User Acceptance Testing is a level of the software testing where a system is tested for acceptability. The purpose of this test is to evaluate the system's compliance with the business requirements and assess whether it is acceptable for delivery.

- Formal testing with respect to user needs, requirements, and business processes conducted to determine whether or not a system satisfies the acceptance criteria and to enable the user, customers

or other authorized entity to determine whether or not to accept the system.

- User Acceptance Testing is a type of testing performed by the end user or the client to verify/accept the software system before moving the software application to the production environment. UAT is done in the final phase of testing after functional, integration and system testing is done.

- It is probably the most important test phase of all as it is where we confirm that the system is fit for purpose to the business stakeholders.

- In this Web application, the customer's acceptance is been monitored and it is been put into usage.

CHAPTER-9

RESULTS

It would be ideal to engage with a development team or carry out specific research linked to your project objectives and goals in order to receive precise and customised results for your project. They may assist you in developing "The Meme Museum" needed features and functions within the context of cloud application development.

CHAPTER-10

ADVANTAGES AND DISADVANTAGES

10.1 ADVANTAGES

Scalability is a feature of cloud platforms that enables your programme to cope with rising user demand and expanding meme collections.

According to our needs, user can easily scale up or down the resources (such server capacity or storage), resulting in the best performance and user experience.

Investing in and maintaining physical infrastructure is not necessary with cloud computing. Instead, you only pay for the resources you actually use, making it a budget-friendly choice for new businesses or initiatives.

Cloud providers take care of routine updates, patches, and security fixes, freeing your staff of these duties. As a result, your team is better able to concentrate on creating new features and improving the user experience.

Disaster Recovery and Data Backup Cloud platforms provide solutions for data backup and disaster recovery, guaranteeing that the data in your application is safe and can be swiftly restored in the event of an unforeseen event or data loss.

Integration with Third-Party Services Cloud computing systems offer connections with a variety of third-party services and APIs, making it simple to include features like social network sharing, analytics, or payment gateways in "The Meme Museum."

10.2 DISADVANTAGES

Although cloud computing can be economical in some circumstances, it's crucial to properly manage resource allocation to prevent unforeseen costs. Inefficient usage of cloud resources might result in higher-than-anticipated costs if effective monitoring and optimisation are not implemented.

For data storage, processing, and privacy, special compliance and regulatory standards apply to certain industries and geographical areas.

Making sure your cloud application complies with these rules could take more work, and it might also restrict the cloud providers you can use.

Limited Control and Customization can be Pre-defined infrastructure and services are offered by cloud platforms, which may limit your capacity to control and adjust the environment to your exact requirements. The limitations of the cloud provider's offers may prevent some application-level customizations or optimisations.

CHAPTER-11

CONCLUSION

Implementation is the stage of the project when the theoretical design is turned out into a working system. Thus it can be considered to be the most critical stage in achieving a successful new system and in giving the user confidence that the new system will work and bc effective.A seamless user experience and a quick development cycle are made possible by the solid infrastructure, strong security controls, and connection with third-party services offered by cloud platforms. Additionally, cloud service providers' automatic updates, maintenance, and disaster recovery options lessen some of the pressures on your development team. The dependence on internet connectivity, data security and privacy worries, vendor lock-in, performance and latency issues, cost management, compliance requirements, a lack of control and customization, downtime risks, and skill requirements are just a few potential drawbacks to take into account. By using IBM DB2 cloud database the cloud is connected and the database is collected and stored.

CHAPTER-12

FUTURE SCOPE

*The Future Enhancements of the application can be allowed to support in all the upcoming android versions.

*Every application has its own merits and demerits. The project has covered almost all the requirements.

*The application can be developed to create biodiversity datasets from social media image data and explore the biases and challenges inherent to the image dataset and the AI classification algorithm using an expert assessment approach.
